FALL AND SPRING PLANTING GUIDE

SPRING FLOWERING BULBS
PEONIES, PERENNIALS,
GLADIOLI, SEEDS

O. M. PUDOR
IRIS AND DELPHINIUM SPECIALIST
PUYALLUP, WASH., U. S. A.
"A THING OF BEAUTY IS A Joy FOREVER"

And such, indeed, is the little Smiling Pool in my front lawn. Have you one? It will be a source of a thousand new joys and interests to you and yours. The planting around my pool, which measures 9 feet in diameter, has been so planned that there is always something in bloom, from early Crocus time until the late Gladioli freeze-up. My smiling pool is built in the shadow of a towering weeping Cut-Leaf Birch Tree, and the main setting consists of one Rhododendron, a Golden Cypress and a Japanese Cedar; the following are the plants used:

**Dwarf-Kept Bushes and Trees:** White Spirea (Bridal Wreath); Red Flowering Wild Currant; Bush Honeysuckle; Single White Rose Bush; Dwarf Cedars and Cypress; Various Ferns; Hardy Azalea.

**Bulbs:** Iris Reticulata; Crocus; Daffodils; Tulips in Varieties; Lilies; Gladioli.

**Perennials and Annuals:** Per. Phloxes; Creeping Phlox; Bleeding Heart; Iris: German, Spanish, Siberian and Japanese; Double-Flowering White Rock (Arabis); Alyssum Saxatile and the Annual Violas; Forget-Me-Not’s galore; Pansies; Per. Candytuft; Primroses; Columbines; Nasturtiums.

**Within the Smiling Pool:** White and pink Pond Lilies and, of course, the dainty Japanese Golden Fan-tail Fish, and a few beautiful Green and Leopard Frogs are dreaming their life away in such a lovely Home. Hundreds of birds visit the smiling pool for their baths and frolics during the season.

ADDED TO MY COLLECTION

MAUVINE, rating 76. A lovely Mauve, the falls a shade darker

STAMBOUL, rating 81. A lovely bi-color on the order of Crusader; very tall and stately, light blue and dark violet; a really wonderful flower

TAKEN OFF THE MARKET UNTIL SUMMER, 1924

ORIENTALIS EMPEROR & PERRY'S BLUE—Reason, oversold.

All MICHAEL FOSTER HYBRIDS—Reason, growth too weak and slow; will keep them in my private collection for breeding purposes, as the flowers are very large and beautifully veined.

Pumila Statellae

ALL THE FOLLOWING IRIS SPECIES ARE OVERSOLD UNTIL SUMMER, 1924

Aurea (Specie)
Fulva
Fulvala
Gigantea Ochroleuca
Japonica
Laevigata Semperflorence
Longipetala
Monnieri
Monnieri Shelford Giant
Tol-Long
Poetissima or Gladwyn Iris
DISCARDED AFTER THE FALL OF 1923

TRAUTLIEB—Reason, poor grower, small flower and washy color.

WYOMISSING—Reason, personally I don't care for it, and most visitors pass it by.

UNGUICULARIS, MID-WINTER FLOWERING IRIS—Reason, does not stand our wet winters here; dies out.

ALL CALIFORNIA IRISES—Except "TENAX". Reason, can not grow them in this climate; "TENAX" does well; it is also a native of this State. I am growing many seedlings from California Iris seeds, and so can you. Seeds for sale, package .................. $0.25

PEACOCK'S EYE, NIBELUNGEN & DARIUS—Reason, all very similar to Loreley and Iris King, and the two latter are the best of this shade and color, and will be kept in stock.

MITHRAS is also of the same color scheme, but I will continue to grow it because it is later than any of the four, and therefore, valuable in the garden.

CORRECTIONS:

On page 43 of my large Iris catalog Mrs. Neubronner is described as a beautiful deep golden self color; this is an error, the color being a light chrome yellow, nearly white in front of beard. The best of the cheaper yellows is Sherwin Wright with an intense all deep yellow, but the blossoms are small and the stalks rather low; Aurea is a fine late flowering yellow, and blooms with Virginia Moore, the best deep yellow. Shekinah is tall and branching, but of a rather light yellow color.

REGARDING IRIS KAEMPFERI (Japanese Variety)

Nearly every grower's collection of Japanese Irises (named varieties) is badly mixed up. I know mine are, and I got them originally from the foremost growers in this country. I am now making arrangements to import direct from Japan this season, all of their best named varieties from the Imperial Gardens at Tokyo, and next season hope to be able to offer a few of these to lovers of the beautiful Japanese Iris.

I am also growing now several thousand seedlings from the finest imported seed, from which I shall select a few dozens of the largest and finest specimens for future propagation and sale.
THE OUTSTANDING IRISSES IN MY GARDENS THIS SEASON

Many hundreds of Iris lovers visited my Gardens this season; they came from near and far; it was very interesting to me to make observations as to what Irises and colors appealed to each individual. There were a few varieties which appealed to everyone, and you may be interested to know just what they were. I should say that at the head of the list stands Crusader, Lord of June, Lady Foster, Prospero and Ballerine, and the following low priced varieties very similar to them, as Oriflamme, Tamerlan and Caterina. Perry's Blue was a mighty close second. Lent A. Williamson was universally admired, but the price of three dollars per, decided many people to purchase the glorious and somewhat similar Alcazar, at 50c.

Magnifica and Asia, as well as Ambassadeur, were viewed with awe and admiration, and though Asia is still in the fifteen dollar class, several enthusiasts decided to have it in their Gardens now, rather than wait until it became cheaper. I think Asia is a marvelous flower; one plant was so heavy with blooms and so tall that it had to be staked.

Mlle. Schwartz was much made of, and so was Dream; I said last year somewhere that a large plant with many stalks was just like a Dream, a sweet and lovely one.

Seminole, of which I had a large bed in full bloom, proved to be a winner; from a distance of 100 feet it was a wonderful sight, almost like a red cloud; in some respects I like it fully as well as Opera; it is not as large, the color not quite as dark, but Seminole grows much taller and, of course, is much cheaper than Opera.

Prosper Laugier was purchased by nearly every visitor, and was much admired, and so was the lovely, late blooming Rhein Nixe. Everyone was inclined to "linger-longer" at that fascinating Lady of the Iris Garden, lovely Isoline, being one of the most popular varieties.

Many visitors exclaimed: "Oh, I must have that," pointing to that old but ever lovely and most beautiful Iris, "Pallida Dalmatica, or Princess Beatrice," and the somewhat darker Pallida, "Albert Victor", was always included. Both are exquisitely fragrant, and speaking of fragrant Irises, "Fairy" reminds one of sweet Orange blossoms; it is probably the sweetest of all Irises. "Caterina" is very similar in fragrance, and so is "Lord of June" and "Oriflamme."

Of the very early bulbous Iris "Reticulata" unfolded its lovely blue blossoms early in March; several bulbs were forced and brought in the house in pots and pans, and were a lovely sight. If you are so fortunate as to have a pool or a rockery in your garden, plant a few Reticulata; if a little
protected they will bloom with the Snowdrops. My Regelio-Cyclus Iris were wonderful; large, handsome, rich-colored and heavily veined blossoms, on the order of Susiana, but of easy culture; Charon was especially wonderful.

I wonder if you have that old, old, but most beautiful and lovely Iris, "Florentina Alba," in your collection; the size and the texture of the blossoms are as fine as any ten dollar Iris, the color, a pearl-white, most appealing, and the fragrance sweet as apple blossoms; it blooms very early, is very floriferous, and blooms for many weeks.

"Zua" is another early Iris, and its crinkled blossoms most beautiful, if only that little Fairy that helped Mrs. Crawford to create it, had put a longer stem under the blossoms; it is quite low growing.

I emphasize again what I tried to impress upon my customers and friends last year; plant other flowers right among your Irises. What a lovely picture it makes to see a bunch of long spurred pink or lavender Columbines snuggle up against some pink or lavender Iris. The pink Oriental Poppy becomes a dream when planted with Oriflamme, Lohengrin or Dallmatica, or others of similar color, and Yellow Day-Lilies among the Lord of June, or Lohengrin, or Shekinah, or yellow Aurea, are too lovely for words. Lupine is another plant that blooms at Iris time; my Lupine "Pink Beauty" adds wonderful charm to an Iris planting, and I am growing now a yellow variety "Sunshine" from England, and some marvelous, long stemmed varieties in wonderful art or bronze shades, suitable for such close companionship as Alcazar, Prosper Laugier, Dr. Bernice. Indeed, the possibilities of an Iris Garden are many fold and wonderful, but don't have just an Iris Garden, have a Spring Flower Garden, filled with April flowering, sweet scented dwarf Iris in white, lovely purple and yellow colors, peeping out here and there among the early Daffodils, then the May flowering varieties with tall Tulips here and there; continue the grand procession with the many hued and gorgeous tall June flowering sorts, waving their tall, lovely blossoms among the graceful, lovely Columbine blossoms, the Pyrethrums, the Lupines, and the lovely, but little known Sweet Rocket, or Dame's Violet (Hesperus) which comes in white, dark-purple and lavender shades; of course, in an Iris Garden, Iris must predominate or it would not be an Iris Garden, but I am sure that in such a planting as I have vaguely suggested, the Iris will grow dearer to your heart, and prove more charming and fascinating in the eyes of all garden lovers than ever before. I don't understand some people when they tell me, "I only want two or three varieties, as I haven't much room in my Garden for Iris." NO ROOM for Iris in a Garden! I can not imagine such a thing; I think such people really mean: 'I have no room for the old fashioned
Blue Flags.” My friend, go and visit a modern Iris Garden next season, and you will sing a different song!

And please, don’t imagine you can have an Iris Garden with all its thousand charms and allurements by planting a few Iris varieties; only if planted by the dozens, by the hundreds, even by the thousands (if you own a large estate), will the Iris take full possession of your soul, and fill your heart’s desire with its many subtle charms and mysterious lures. Can’t afford it? You can afford a hat that costs ten, fifteen or twenty or even fifty dollars, that lasts but a season, and then its glory, if glory it possesses at all, is gone forever; how much does a pair of high heeled slippers cost, a pair of silk hose, a box of cigars? The admission to many a rotten, soul sickening show is a dollar or two dollars; men will pay ten dollars to see a prize fight, five dollars for a bottle of moonshine that makes a cave-man seem like a lamb, and then some people will exclaim when they are asked 75 cents for an Oriflamme, 60 cents for an “Isoline” that will pleasantly haunt you with its loveliness months after it is gone; three dollars will buy a “Lord of June” that puts a hat or a silk hose—but, no, there is simply no comparison. And then consider the interest on your investment; in two or three years a plant will double, triple and more than quadruple. Expensive? Think! Two dollars and a half will buy a dozen such lovely things as “Fairy,” “Queen of May,” and others; for five dollars you can get a collection of twenty or more of some of the handsomest, fairest Irises, even if they are old sorts. Think of the years of joy and happiness they will bring you! If you can use some Iris varieties by the dozen or fifty or hundred, I am in a position to make you some very attractive prices for late summer planting, which, by the way, to my mind is the very best time to replant Irises.

UNLESS YOU HAVE ALREADY A COPY OF MY LARGE IRIS CATALOG, PUBLISHED LAST SPRING, I SHALL BE PLEASED TO MAIL YOU ONE. IT IS A RARE CATALOG, AND UNLESS SPECIALLY INTERESTED IN THE IRIS FAMILY, PLEASE DO NOT ASK FOR IT.

IRIS SEEDS

I will be in a position to offer Iris seeds in limited quantities for sale this summer—about August. I usually sow in September with some exceptions Iris rarely forms seed pods; I grow long rows, 300 feet and longer, and not a seed pod will form with some varieties; so, as a matter of course, seed is necessarily expensive. Seeds from mixed

IRIS PUMILA—These come quite true to type—about
50 seeds, pkg. ................................................. $0.50

IRIS GERMANICA—(tall June flowering)—very shy seeders (these come not true to variety); 50 seeds, pkg... 1.00

SIBERIAN IRIS—These come quite true to the type—
not counted. Per pkg. ........................................ .25

SIBERIAN EMPEROR AND PERRY'S BLUE—Either variety (amount very limited); not counted, per pkg.... 1.00

JAPANESE IRIS—Both from home grown and imported
seed, per pkg. .................................................. .25

The Japanese Iris grows very readily from seed, plants blooming often the second or third year, and some of the most beautiful and charming new varieties and colors have so come about. I sow my Japanese seed early in the spring, and within 60 days a fine stand has come up. The German and kindred Iris seeds do not germinate as readily, only 33% to 50% of the seeds will germinate the first year, the balance lying dormant in the soil for two years, and, indeed, some will sulk away for three years; but these sulkers have often proved to be the “charmers.” I sow all my Iris seeds early in the Fall, sowing in flats, and putting away in cold frames; it has the advantage of keeping tab on your seeds and plants; grass and weed seeds can easily be kep out of the little seedlings during the following spring and summer, more so than in the open field, although I do sow lots of seeds in open rows; but unless you do things right up to the minute weeds and grass will soon drown out your Iris seedlings. The following late summer, I transplant the seedlings in rows, about 12 inches apart, and by another year many of these seedlings will bloom; the flats are left undisturbed, as I said, for two and three years of course, as soon as the rain ceases, and the soil becomes dry, they will have to be watered almost daily.

SPECIAL NOTICE—I do not sell hand pollenized Iris seeds at any price, using all these myself. Should you desire seeds of any of the new and rare Irises, such as Lent A. W., Lord of June, Prospero, etc., in fact, of any special Iris variety, write me, and I will do the best I can.
SPRING FLOWERING BULBS FOR FALL PLANTING
BLUE SCILLAS

Few bulbous plants give so much satisfaction as the Wood Hyacinths; they last long in flower, force readily and thrive apace in any position and soil and bloom profusely early in the spring. Doz. 50c; $3.50 per 100, postpaid; $30.00 per M, by express, collect.

LILY OF THE VALLEY

Fine home-grown roots or “pips” for garden-planting. Once planted it will grow and spread out and bloom beautifully with no care at all. Plant a small bed of them by all means. They will be good for a lifetime. Will grow well even under trees or among shrubbery. This lovely old-fashioned flower is too well-known to need description here and every flower garden, if not already supplied, should have it by all means. Fine single roots, 75c per doz.; $5.00 per 100. Extra strong clumps, 50c each; $5.00 per dozen.

MIXED NARCISSUS AND DAFFODIL BULBS

Home-grown, choice, healthy blooming sized bulbs. Comprising the following choice varieties:

EMPEROR (huge yellow trumpet) EMPRESS and VICTORIA (Bi-color), BARIU CONSPICUOUS (a lovely single medium trumpet), mixed only, 75c per doz.; $5.00 per 100, postpaid.

SEPARATE NAMED VARIETIES

HENRY IRVING—A very early, pure yellow trumpet variety, 85c per doz.; $6.00 per 100, postpaid; $40.00 per M, f. o. b.

MME. DE GRAFF—Pure white perianth, trumpet primrose; a very beautiful color combination. 10c each; $1.00 per doz.; $7.00 per 100.

BARIU CONSPICUOUS—A beautiful single medium trumpet Narcissus, also called Chalice Cup or Star Narcissus. Perianth broad, soft yellow, orange scarlet cup. A wonderful free bloomer; splendid for borders. 75c per doz.; $5.00 per 100, postpaid; $40.00 per M, by express, collect.

GLORY OF LISSE—A lovely single large, pure white Narcissus; very sweet; one of the best; long stems; fine for cutting. 75c per doz.; $5.00 per 100, postpaid; $40.00 per M.

POETICUS GRANDIFLORA—The best in that class; much finer than the common Poeticus (Pheasant’s Eye). Broad, wide-spreading perianth of snowy white; very small flat cup deeply rimmed dark red; a flower of fine shape; a tall and vigorous grower; excellent for pot culture. 60c per doz.; $4.50 per 100.
LEE DSII MRS. LANGTRY—Pure White perianth, with primrose cup; very free flowering; used extensively for mass planting; a lovely, dainty flower. 60c per doz. $4.50 per 100, postpaid.

ELVIRA—The best of the cluster-flowered Poet's Narcissus. Perianth pure white with a yellow eye; three or four flowers; two or three flower stems to bulb; strong, tall grower and free flowering. Splendid for pots, pans or gardens; very sweet. 10c each; 90c per doz.

These bulbs will be ready in August, and should be planted in the early fall—spring planting will not do.

IMPORTANT NOTICE! Prices quoted on bulbs include the postage charge, but for Western States only. To North and South Dakota, Nebraska, Kansas, Oklahoma and Texas, and all states east of there add 10 cents to the dozen prices and 50 cents to all 100 prices.

PERENNIALS

The hardy perennials are the most satisfactory flowers grown; once established, they will greet you year after year. Nearly all varieties should be separated in the early Spring every three years, with the possible exception of the Delphinium, which rather resents being disturbed and cut up.

ACONITUM—Aconite-Monkshood; beautiful blue flowers late in the summer, somewhat similar to the Delphinium, 35c each.

AQUILEGIA—Columbines. I have a very fine collection of Mrs. Scott Elliott's strain of Long Spurred Hybrids; the flowers are very large and of distinct shades of blues, lavenders, mauves, whites, pinks, reds, yellows, etc. They were greatly admired last spring during my Iris Garden Show, and they adapt themselves beautifully when planted among the Iris. Strong seedling plants that will bloom next season, 75c a dozen; 40c for six; large field grown plants 25c each; $2.50 per doz. Please note that I do not sell Columbine plants by individual colors.

ASTERS—Perennial or Michaelmas Daisies. Very beautiful, late flowering single daisies; they are giving a wealth of bloom during September and October, a season when most other flowers are past, and for the best effects should be planted in masses; they are very hardy and grow freely in any soil, multiplying very rapidly.

ST. EGWIN—A soft, rosy-pink, 3 to 4 feet; the whole plant is enveloped with these daisy-like pink flowers. 25c each; $2.50 per doz.
NOVI BELGI CLIMAX—Plants of strong, vigorous habit, over 5 feet high, fully one-half of which consists of much-branched pyramidal-shaped flower stems filled with light lavender-blue flowers, each 1 1/4 inches or more in diameter. It blooms from the latter part of August until the middle of October. Each, 25c; $2.50 per doz., postpaid; $15.00 per 100 (by express, collect.)

ROYCROFT PURPLE—A large, deep purple with yellow center; very attractive color and exceedingly showy; blooms in October; a rare and distinct kind. 50c each; $5.00 per doz.

One each of the above three rare and distinct kinds of late-flowering Michaelmas Daisies, 75c prepaid. Spring Delivery Only.

DELPHINIUM—or Perennial Larkspur—one of the finest and most showy flowering plans of the hardy garden; spikes of beautiful blue shades 4 to 6 feet tall. 25c each; $2.50 per doz. See special paragraph of my wonderful strain of double flowering Delphiniums, "Glory of Puget Sound."

DELPHINIUM "BELLA DONNA"—Light blue; a lovely and distinct variety. Strong divisions 35c each; seedling plants $1.00 per doz.

GYPSOPHILLIA—Baby’s Breath; the tiny white flowers are borne in myriads on such slender stems that they appear as clouds floating in the air; no garden is complete without a clump of Baby’s Breath. 25c each. The rare Double Baby’s Breath, 75c for a root.

HOLLYHOCK—Newport Pink; a beautiful double rose-pink; each 25c.

LILY OF THE VALLEY—These must be grown in the shade in rich soil; hardy anywhere. 10c a pip; large flowering clumps, 50c each.

LUPINES—“Pink Beauty.” This particular variety has been greatly admired by all who have seen it grow in my gardens. A 3-year-old clump will produce from 20 to 40 of the most wonderful pink flowering spikes, 36 to 40 inches tall, lasting for several weeks. It makes a grand border plant, or a wonderfully beautiful individual specimen. 25c each, $2.50 per doz. (See photo back cover.)

LUPINE "SUNSHINE”—Waterer’s New Yellow Lupine; direct imported from England. Without doubt the most brilliant yellow Lupine yet raised. Its massive spikes are freely produced, and the color is good and bright. 50c each; seeds, per package, containing 50 seeds, 50c; late summer delivery.
LUPINE "BLUE BEAUTY"—Similar in habit and growth to Pink Beauty, but the flowers are a deep blue. 25c each; $2.50 per doz.

ROSA SPINOSSISSIMA
A Lovely, Pure White, Single Wreath Rose

This is another gem in my gardens, and everyone wants one. A very large, single, pure white rose with golden stamens with an exquisite perfume. Plant is of strong, healthy growth, and develops into a bush about 4 or 5 feet tall, with long pendular branches covered in the early part of June with these exquisite large single white roses. It blooms for several weeks. A hedge of these roses would be a never-to-be-forgotten sight. Entirely hardy, and increases very fast from root shoots. Price, 35c each; 3.50 per doz., postpaid.

FRESH, DEPENDABLE SEEDS THAT WILL GROW

Many visitors to my Gardens who have so greatly admired my wonderful strains of Columbines, Delphiniums and Lupines, have urged me to sell them seeds from these plants, and the results have greatly pleased them. One lady in Canada having bought a package of 50 seeds of my Lupine "Pink Beauty," reported to me having successfully raised 51 plants from such a package. Seeds from my wonderful "Glory of Puget Sound" strain of double Delphiniums, I have sent to almost every state in the Union, and many foreign countries. Columbines are easily raised from seeds, and all of these three perennials grow into finer and healthier specimens when raised from seeds, instead of propagated from divisions.

Seeds may be sown either in the early spring, or in the fall. Fall raised seedlings will bloom the following year. I usually begin selling new seeds in July or August for late summer sowing, but these same seeds will sprout equally successfully the following spring.

COLUMBINE—Seeds, per package .........................$0.15
PINK LUPINE—50 seeds for .............................. .25
NEW YELLOW LUPINE "SUNSHINE" (Fall) ............. .50
DELPHINIUM—English Hybrids, per package .......... .25
DELPHINIUM—"Glory of Puget Sound", per package..... .50
DELPHINIUM "BELLA DONNA"—The lovely light blue; grows rather low with loose graceful flower stalks; per package ............................................ .25
ORIENTAL POPPY—"Perry's Pink," a lovely shade of pure salmon-pink; per package ......................... .15
SWEET ROCKET or DAME’S VIOLET (HESPERUS)—An old-fashioned perennial; grows 3 or 4 feet tall, blooms for several weeks from Decoration Day on, and is lovely among other perennials or in front of shrubbery; very sweetly scented. Color a pure white and a deep violet; state which color you want. Sow early in the Fall, or in the late summer, and next May the plants will bloom profusely. Per package ..............................$0.15

PUDOR’S “GLORY OF PUGET SOUND” STRAIN OF DOUBLE FLOWERING DELPHINIUMS

Years ago I acquired a particular admiration, a warm and growing love for these heavenly, blue flowers; nothing in the garden to my mind is quite so inspiring and beautiful as a row or bed filled with clumps of Delphiniums or in a hardy border in front of green shrubbery. The spikes of lovely flowers rise to a height of 4 to 8 feet, supplying our gardens with a wealth of blue flowers.

I used to raise seedlings then as a hobby, for you must know that Delphinium seedlings do not come true to the mother plant, and only by the most careful and patient watching, waiting and selecting can you hope to get a few fine seedlings out of a hundred, two or three extra fine prize winners out of thousands.

One year I noticed among my seedlings an unusually fine one; it grew healthy, vigorous and rapid from the start. When it bloomed it enfolded a lovely, double flower of exquisite texture; one row of 5 outer petals a beautiful sky blue and this overlaid with another row of 7 inner silvery mauve petals; each flower as large as a silver dollar with a very small bee or center. My strain is noticeable for having a very small bee, or center, which I am breeding out more and more, and some of my newest seedlings have hardly a noticeable bee, which to my mind makes it a much more beautiful flower.

THIS SEEDLING I NAMED THE “GLORY OF PUGET SOUND,” AND I HAVE NOW A SUFFICIENT NUMBER OF PLANTS ON HAND FROM THE ORIGINAL SEEDLING, THAT I AM ABLE TO OFFER ONE TO A CUSTOMER AT $1.00 EACH.

Year after year I carefully saved and sowed the seeds from this original plant, and by the most careful selection I have succeeded in raising several new hybrids from my original “Glory of Puget Sound” which are far more beautiful, larger and more double than the original mother plant. A new unnamed seedling has flowers 2¼ and 3 inches across.

Last year I raised a double, pure white Delphinium, such as there is none like it in existence, and I trust in a few years’ time to offer a few plants to garden lovers.
I am this year in a position to offer a limited number of my newest named seedlings; new varieties that are marvelously beautiful; most carefully bred and selected Hybrids that stand in a class by themselves. Read what Mr. Luther Burbank says of my strain:

Santa Rosa, California, Sept. 9, 1922. “You certainly have some wonderful Delphinium hybrids * * * but your white one is unusual, though I have some white with the faintest tinge of blue; these, however, are all single.” Luther Burbank.

My Delphinium “WHITE GLORY” is a pure white, and is double and I hope to be able to sell a few plants in 1924. The flowers are 2½ to 3 inches in diameter, each flower stalk 5 feet tall.

**DELPHINIUM “GLORY OF THE VALLEY”—**A beautiful color combination of light blue and silvery mauve; a free bloomer with lovely, graceful flower stalks, with many side shoots. Per plant ...................................... $2.50

**DELPHINIUM “BLUE GLORY”—**A double, clear deep blue; a wonderful rich shade. Per plant .................. $1.50

**DELPHINIUM “PUDOR’S LATE GLORY”—**This is the finest of all my beautiful “Glory of Puget Sound” seedlings, and the blossoms are the largest—larger than a silver dollar, and of exquisite texture and color; one row of petals being a lovely sky blue edged with a deeper blue, and the inner petals rosy mauve. It grows six to seven feet tall, with many graceful flowering stalks, and is undoubtedly one of the most exquisite Delphiniums in the world. I named it the “Late” Glory because it comes first into bloom when other Delphiniums are just going out of bloom, and for that reason it is a very desirable Delphinium to have in one’s garden. It has a very peculiar solid root formation. The plant is vigorous and sturdy as all my seedlings are. I offer a few plants for sale this year (early fall delivery) price, each .................................................. $3.00

**DELPHINIUM SEEDS**

I offer seeds for sale from my “Glory of Puget Sound” Seedlings as above described, at 50c per package. While Delphinium seeds do not come true to the mother plant, the game is most fascinating, for the finer the mother plants are from which you take the seeds, the finer new seedlings you are apt to get; some seedlings will always be inferior, a good many will be similar to the mother plant, and a few will surpass it in beauty, and if you are lucky you might get a rare gem among your seedlings. Raising Delphiniums from the finest, choicest seeds, such as I offer you here, is the most fascinating game in the garden, I think. By carefully selecting only the finest flowering plants every year, and throwing away all the inferior plants, in a few year’s time you will have as fine, or finer, delphiniums in your garden than the famous English Hybrids.
PEONIES

These roots or tubers must be planted in the Fall, September or October being the best months. Bear in mind that when planting them (in rich soil, for Peonies are very heavy feeders), the new eyes or shoots must not be covered deeper than about 2 inches below the level of the ground; if planted deeper your Peonies are likely never to bloom. Let no manure come in contact with the roots at any time. Peonies may be divided every 6 to 8 years; it is well to remember that the first year after the division is made and planted, blooms will be very few, or none at all, and often the blossoms are small and not a good representative of the respective variety. I have noticed this same peculiarity in Delphiniums, often a clump when cut up into small pieces, the first blossoms the following season will often be smaller, and double ones will come single, and even the color often is of a different shade, but as soon as established, and when the next set of blossom stalks come up, they will be as the original clump. So don't be disappointed.

It is best to divide Peony roots into three eyed divisions; they do best that way, and recover quickest, and I sell them that way; it will never do to transplant large clumps. The following are good, satisfactory, and low priced Garden varieties:

**OFFICINALIS RUBRA**—The old fashioned Decoration Day Peony—brilliant scarlet ........................................ $1.00

**OFFICINALIS ROSEA**—A lovely, very early blooming, pure rose-pink ...................................................... $1.00

**QUEEN VICTORIA**—Large, globular. Milk-white guards, tinted flesh; strong free bloomer; mid-season .................... 75c

**EUGENE VERDIER**—Very large, lovely, sweet scented, pale pink; just like a big, lovely water lily; I think it is one of the loveliest peonies ........................................... $1.50

**MARIE LEMOINE**—Large rose type. Pure white, with cream white center, very lovely and fragrant; extra strong stem, blooms late ................................................................. $1.00

**PRESIDENT ROOSEVELT**—Color deep, rich brilliant red; a very large showy flower ........................................... $1.00

**GLADIOLUS FOR SPRING PLANTING**

The most satisfactory, desirable and popular of all garden bulbs. Nothing else that I know of costs so little and grows and blooms so readily in any soil or climate. They grow and bloom readily with but little care or attention and make a display in the garden unequaled by any other bulbous flower. Gladioli are of the simplest culture. Can be planted at any time from March to June, either in beds by themselves or
among your roses and shrubs. All my bulbs are of flowering size and every one will bloom the first season.

(Everything in this list is priced at postpaid prices in single and dozen lots. Per 100, by express, collect.)

CRIMSON GLOW—A magnificent crimson flower stalk—the best pure crimson .......................... 15c each

EVELYN KIRTLAND—A splendid variety with large flowers of wonderful substance of rosy pink at the edges passing to shell-pink in the throat, with fiery scarlet blotches on lower petals. A strong, robust grower. 10c each; $1.00 per doz., first size. Younger, flowering bulbs (1 to 1¼-in.), 75c per doz.; $5.00 per 100.

FLORA—Beautiful golden yellow, large flowers; very strong growers; 15c each; $1.50 per doz.

GRETCHEŃ ZANG—Soft melting shade of pink, blending into scarlet on lower petals. Tall, strong spikes. A wonderfully beautiful variety. First size, 10c each; $1.00 per doz. Younger, flowering bulbs (1 to 1¼-in.) 75c per doz.; $6.00 per 100.

"LE MARECHAL FOCH"—A wonderful new pink variety, with immense, wide open flowers that are a charmingly beautiful shade of light pink. Blooms as early as Halley and the flowers are twice as large as those of America. Strong grower, and rapid multiplier, doing well under all sorts of conditions. Will be grown more extensively than America was ever grown, as soon as stock of it becomes sufficient. "A gem." Size No. 1, 15c each; $1.50 per doz. Size No. 2, 10c each; $1.00 per doz.

LILYWHITE—PURE AS THE LILY! WHITE AS THE SNOW! The long desired spotless White Gladiolus that will bloom well without special care, vigorous in growth and extremely early (flowering a full week ahead of all other white varieties in our gardens). "Lilywhite" is an ideal forcing variety and sure blooming sort. With a stronger constitution than any other pure white Gladiolus, absolutely healthy, and a profuse yielder of bulblets, "Lilywhite stands in a class by itself. The blossoms are of lovely form, placed nicely on straight, tall spikes, and are of good size and perfect Milk White color, large bulbs opening from six to eight flowers at once. (H. E. Meader.) Size No. 1, 15c each; $1.50 per doz. Size No. 2, 10c each; $1.00 per doz.

L'IMMACULEE—The most beautiful, pure white gladiolus. Large spikes with many beautiful lily-like flowers open at one time. 15c each; $1.50 per doz.
LOUISE—The Orchid of Gladioli. This remarkable new Glad-
iolus, I believe, is the largest Gladiolus yet produced, 
blooms frequently measuring 6 to 6½ inches across. An 
exquisite shade of bright lavender, growing brighter to-
ward center, with a velvety maroon blotch down the center 
of lower petals. Multiplies freely and bulbs germinate ex-
ceedingly well. Size No. 1, 25c each; $2.50 per doz. Sec-
ond size, 15c each; $1.50 per doz.

MRS. DR. NORTON—In greatest demand of them all. La 
France pink over white ground and yellow throat, mag-
nificent, tall. Large, 1-in. to 1¼-in., 25c each; $2.50 per 
dozen.

MRS. WATT—A tall wine red, very distinct and beautiful, 7c 
each; 75c per doz.

MRS. FRANK PENDLETON—The flowers are very large and 
well expanded, of a lovely flushed salmon-pink, with brilli-
ant carmine blotches. 10c each; $1.00 doz.; $7.00 per 100.

MRS. FRANCIS KING—A striking shade of light scarlet or 
flame col’or; one of the most effective. 5c each; 50c per 
dozen; $3.00 per 100. First size only.

PINK PERFECTION—This magnificent sort is a soft apple-
blossom pink with chamois suffusion that is very attrac-
tive. 15c each; $1.50 per doz.

PRINCE OF WALES—An early flowering sort with fine spikes 
of large flowers of delicate apricot-pink, suffused salmon. 
7c each; 75c per doz.; $6.00 per 100, first size. Younger 
flowering bulbs (1 to 1¼-in.), 50c per doz.; $4.50 per 100.

SWEET LAVENDER—It is early—it is beautiful; it has all 
the qualifications of a first-class commercial sort. A 
lovely combination of light lavender-pink, blending into 
creamy yellow, with prominent magenta-red blotch. An 
early flower of good substance; beautiful and imposing. 
Not for sale this season.

IMPORTANT—Plant the bulbs 5 to 6 inches deep—plant 
them in clumps in preference to straight rows. Commence 
planting April 15th—two weeks apart until June 15th—and 
you will have a wonderful display of the most beautiful flowers 
from the later part of June until frost. Take your bulbs up 
after maturity and before freezing weather sets in. Clean 
them off and store in a cool, dry place.

All Prices Postpaid.

Sincerely yours,
O. M. PUDOR
IRIS AND DELPHINIUM GROWER AND BREEDER
Puyallup, Wash.
SPECIAL NOTICE

PLEASE READ

POST-PAID PRICES quoted herewith cancel all previous quotations, either by letter or in printed lists, and are subject to change without notice. A dozen plants will be furnished at ten times the price for one; six plants will be furnished at dozen rates; price for hundred lots or for larger quantities quoted on application.

TERMS: Cash with order. Remittance may be made by postoffice order, express order or bank draft.

ORDERS should be sent as early as possible, as stock of rarest varieties is very limited. Orders will be accepted subject to being unsold when they are received. If stock is exhausted, I will return the remittance. No order for less than one dollar will be accepted.

C. O. D. ORDERS will not be accepted unless accompanied by at least one-half of the amount in cash.

SHIPPMENTS will be made by Parcel Post (insured) PREPAID, and in comparing my prices with those of other growers it is well that you bear this in mind. If instructed to be sent by Express, purchaser will pay the charges, and in such cases I can afford (saving the postage) to send you extra strong and large roots (except, of course, in the case of the rare and high priced varieties.

COMPLAINTS, if made immediately on receipt of goods, will be investigated at once, and, if due to my negligence or carelessness, will be promptly rectified.

No order for less than $1.00 can be filled.
Lupine "Pink Beauty" (A 3-year-old clump)
20 to 40 spikes, 3 to 4 feet tall.
